

ESP32 Shutter Tester Parts V1.1

Below are links to the parts required to make the ESP32 Shutter Tester.

Links are valid now, but of course could become dead in the future.

Links are (mainly) for UK suppliers and are a guide only. Use a supplier from your country.

Ordering from China either from eBay sellers or AliExpress, the parts will be much cheaper.

Note, often if buying from AliExpress, there is an express shipping option, if buying parts over a set value.

ESP32 NodeMcu board. 38 pin version. USB-C CP2102

[NodeMcu ESP32 WROOM-32 Type C Development Board Dual Core WLAN WiFi Bluetooth | eBay](#)

IMPORTANT. There are multiple variants of this board. Get 38 pin USB-C and CP2102 chip

ESP32 prototype/breakout board (38 pin screw-terminal version)

38 Pin Breakout Board For ESP32

Laser tx & rx module.

Three Laser tx modules and three rx modules are required. Whilst the third (centre) Laser is not currently in use, omitting now will stop future firmware updates, so it is best to build it into the hardware now.

Note:- Development of the project may include five Laser tx and five rx modules. This will allow the current 32mm spacing for horizontal shutters and additionally 20mm spacing for vertical shutters.

The sensor is supplied loose. ENSURE YOU INSERT IT THE CORRECT WAY ROUND!!!. Little bubble lens points towards the header pins.

Note:- link is for a China supplied pack of 5 pairs. UK prices are far too high, I could not find a reasonably priced tx & rx pair in the UK when compiling this list.

LCD Module 2004 with IIC

Ensure you get a module that includes the IIC or i2C module. You can save money and not buy the LCD. The code also prints the results to the PC screen.

Button Module.

There are all sorts of buttons available, feel free to choose different ones depending on your final design. This module has the advantage of header pins for use with Dupont jumper wires. Whilst not all buttons are currently in use, having this options allows future firmware updates without hardware change.

[4 Button Key Module Switch Keyboard Push Button Switch Board 7018965086109 | eBay](#)

Dupont wires.

Get male to female ones if using the screw terminal prototype board.

Different lengths are available. It is suggested 30 or 40cm ones for the Laser tx & rx connections. 20cm for connection to buttons, LCD etc.

TFT display.

Currently not supported, but there are plans to add either a 2.8" or 4" display in future builds
